September Project Highlight Renaissance Atlanta Airport Gateway Hotel

Arrival Porte-coc

The Renaissance Atlanta Airport Gateway Hotel is a 204-key hotel designed to appeal to the millennial business traveler. Hotel amenities include ballroom and meeting facilities, a full-service southern-fare restaurant, signature bar featuring a variety of seating options, and an outdoor landscaped courtyard with a custom water fountain and gas fire-pit tables. The property is conveniently accessed from the nearby SkyTrain, which is a single stop from Hartsfield-Jackson Atlanta International Airport. Parking, including valet service, is provided in the adjacent parking deck.

RJTR was responsible for master planning and complete architectural design services for this 7-story hospitality project. In that role, the design team worked closely with the developer, Grove Street Partners, to design this luxury hotel, a Renaissance brand for the Marriott Corporation.
